Step 1. Starting the Submission

You are now submitting to the **JMIR Medical Informatics.**

You can switch and submit to Select a journal...

1. START 2. ENTER METADATA 3. UPLOAD SUBMISSION 4. UPLOAD SUPPLEMENTARY FILES 5. CONFIRMATION

Authors submit items to this journal through this web site in a five-step process for uploading the manuscript and relevant information (with an option to upload, as well, supplementary files, such as research data and instruments). If difficulties are encountered in this process, contact Tech Support by email or phone (+1) (437) 836-3214 for assistance.

Corresponding Author Affiliation

If applicable, select one of the following institutional members the corresponding author is affiliated with.

Submission Checklist

Indicate that this submission is ready to be considered by this journal by checking off the following (comments to the editor can be added below).

- [x] The submission has not been previously published nor is it before another journal for consideration; or an explanation has been provided in Comments to the Editor.
- [x] The submission file is in Microsoft Word (.doc/.docx), or RTF document file format.
- [x] The text meets this journal's formatting requirements, in particular those summarized in the Author Checklist found in Instructions for Authors. The text employs *italics*, rather underlining or bold as emphasis; with figures and tables (portrait only, no land

Support

- [x] I have read and understood the fee schedule. In particular, I understand and agree that unless my department/organization is an institutional member BEFORE submission (see dropdown-list in step 1 of the submission process), I/my department will be billed for the article processing fee (APF) in case of acceptance.Please mention in your cover letter if you think the APF should be waived due to membership or for any other reasons.Journal sections marked with * may be eligible for a fee waiver or reduction under certain circumstances (must be justified in the comments field for the editor on submission). APFs may not apply for article categories marked with * (check instructions for authors). Note that the APF will also be billed if the author retracts the manuscript after acceptance, or if a case of scientific misconduct prevents us from publishing a manuscript after acceptance.

- [x] (please check this checkbox even if you do not wish to fast-track as an indication that you read this). I understand that if I wish to fast-track the paper, I will pay the Fast-Track-Fee immediately after submission (a payment link will be provided after submission) or at a later stage. The FTF guarantees an editorial decision within 20 working days (see website for further instructions)

- [x] I understand that all author names and their affiliations for the final publication will be taken from the database (metadata form), not the submitted manuscript, thus all author names must be entered in the metadata form during submission. Authors may remove author names from the manuscript if they prefer blind review.

- [x] P-values are reported in accordance with our instructions for authors.

- [x] Authors agree that the manuscript and peer-review reports may be transferred to a JMIR sister/partner journal (e.g. i-JMR, JMIR Res Protoc, and others), if the paper is not found suitable for publication in JMIR, but is publishable in another journal. The submission fee for that partner journal (if any) will be waived, and transfer of the peer-review reports may mean that the paper does not have to be re-reviewed. Authors will receive a notification when the manuscript is transferred, and at that time can decide if they want to pursue publication in a sister/partner journal. If authors do NOT wish an automatic transfer to an alternative journal after rejection for JMIR, this should be noted in the cover letter.

- [x] I understand that I/my department will be billed for the article processing fee in case of acceptance (http://medinform.jmir.org/about/editorialPolicies).

Choose an open peer review option

In addition to undergoing JMIR Publications' standard peer review, where reviewers are selected by the Editor, you have the option to also enable JMIR Publications users from the community to participate by nominating themselves to review your manuscript.

This requires making your manuscript title and abstract publicly available so that prospective reviewers can find articles open for review that match their expertise.

Reviews received via this self-nomination process, and deemed suitable by the Editorial Office, can help contribute to the peer review of your manuscript, potentially leading to a faster turnaround time of your manuscript review.

Find out more about this peer review option at JMIR and its benefits here.

○ b. No - My manuscript should only be reviewed by reviewers selected by the Editor (i.e. JMIR Publications' standard closed peer-review process).

Choose a preprint option

A preprint is a citable version of your manuscript published ahead of formal peer review. Many major funders (e.g. NIH, Wellcome, Gates Foundation) encourage or require preprint posting. Learn more about JMIR Preprints.

Important notes:

1. If you choose to publish your submission on JMIR Preprints, your preprint will receive its own DOI, and the title and abstract will be publicly visible. Additionally, preprint metadata will be submitted to Crossref.
2. Once you have published your submission as a preprint, it will persist permanently, regardless of whether your submission is ultimately accepted or rejected by a JMIR Publications journal.
3. If your preprint has been accepted and published as an article in a journal, the preprint web page will contain a link to the final, published version of your article.

2. Would you like to publish your manuscript as a preprint?

Preprints are published independently of the journal review process and will remain publicly available regardless of the editorial outcome.

◉ a. Yes – Make my manuscript publicly available as a preprint immediately.

○ b. No – I do not wish to publish a preprint.

Choose an accepted manuscript option

Once your submitted manuscript is accepted for publication in a JMIR journal, you may choose how available you would like your accepted manuscript PDF to be.

Important notes:

1. If, after acceptance by a JMIR journal, you choose to participate in JMIR's PubMed Now! service, then the PDF for your accepted manuscript will automatically be openly available to comply with PubMed's rules, regardless of the setting you choose in question 3, below.
2. Regardless of the visibility setting you choose in question 3 (below), your accepted manuscript will receive a DOI, and the title and abstract will always display for any user.

(Recommended).

○ b. No. Please do not make my accepted manuscript PDF available to anyone. I understand that if I later pay to participate in JMIR's PubMed Now! service, my accepted manuscript PDF will automatically be made openly available.

Nominate external reviewers

Submitting authors are asked to **nominate 2-4 external reviewers** to review their manuscript. Please do not contact suggested reviewers in advance. Do not suggest members of the Editorial Board. A minimum of 2 suggested reviewers is required and if you wish to add more, please click "Add Another Reviewer". Note that suggested reviewers' information cannot be revised after submission.

Please avoid any conflicts of interests such as nominating supervisors or people/colleagues you've worked with closely. Ideally, select authors from important papers in your field (perhaps those you cite; identify their email address through pubmed.gov).

* Indicates fields that must be completed to proceed.
