Dear Samuel,

Thank you for your interest in the Visual Abstract service offered by *JMIR Publications*.

We confirm that we have received payment for the visual abstract service for your accepted article ms#96541

We will collaborate with you to design a *static* visual abstract for your paper in line with JMIR's brand guidelines and style requirements. You can find more details about the service and examples of visual abstracts designed by *JMIR* in our Knowledge Base article here: [What is a visual abstract?](#)

To ensure we accurately convey the key points of your research through the visual abstract, we request that you **answer a brief questionnaire [here](#)**. Your input will be invaluable in determining the content of the visual abstract. We hope you can respond to the questionnaire **within 2 days**.

If you would like to provide any other relevant reference material (eg, a presentation/slide deck/poster created by the study group, a rough sketch, or other text/visual reference files), you may send those as an attachment in response to this email.

Once we receive your responses, our team will begin designing the visual abstract to summarize your research findings. The visual abstract *draft* will be shared with you for your review and approval. Kindly note, to adhere to our publication schedules, we allow only one round of author review and feedback on the draft. Any additional and/or extensive modifications requested thereafter may lead to additional charges.

While we will strive to publish your Visual Abstract and manuscript simultaneously, your article may be ready for publication first. To avoid any delays in disseminating your research, we will proceed with publishing the article along with a standard ToC image (thoughtfully selected by JMIR staff), and we will replace this with the Visual Abstract as soon as it is ready. If you have any questions or concerns about this, please let us know.

This entire visual abstract process typically takes **3 weeks** from the time we receive the completed questionnaire.

We look forward to your response and completed questionnaire.
Warm regards,

Natalia March

Dear Samuel,

We have now completed revising the visual abstract for your manuscript according to JMIR's preferred style requirements.

Kindly review the attached draft and confirm whether all the text and data presented are accurate. You may add your feedback notes or suggestions directly to the PDF file by using the comments feature. As a reminder, we only allow one round of author feedback and iteration for visual abstracts, so we request that you share consolidated feedback from all authors.

As a reminder, we only allow one round of author feedback and iteration for visual abstracts, so we request that you share consolidated feedback from all authors.

Please respond with any feedback **within 2 days**. If you need additional time, please let us know at the earliest.

We look forward to your prompt response.

Hi Natalia,

Thank you, this looks great. The visual abstract captures the paper accurately, and I am happy with the design, the structure, and the flow.

In the attached file, 20260825_IJMR_Visual_Abstract_commented.pdf, I have 2 comments for corrections:

Current text:

"This study calls for the Human-in-the-Loop Knowledge Governance (HITL-KG) to shift knowledge from human memory to durable artifacts"

Requested text:

"This viewpoint calls for the Human-in-the-Loop Knowledge Governance (HITL-KG) framework to shift knowledge from human memory to durable artifacts"

Comment 1. "This study" to "This viewpoint". The article is a Viewpoint and reports no primary data. The manuscript reserves the word "study" for the empirical companion paper, and states that "empirical validation is deferred to a companion study."

Comment 2. Adding "framework" after (HITL-KG). Without it, the sentence has no noun for "to shift" to attach to. "The HITL-KG framework" is the phrasing used in the manuscript, and it also matches the heading in the middle panel.

Thank you again for putting this together.

Best,
Samuel

Hi Samuel,

Thanks for the positive feedback! I've noted both requested text corrections from your attached PDF.

Wishing you all the best with your publication.

Hi Natalia,

Thank you for making both corrections and for turning the draft around so quickly.

I'm glad to see that the paper has been published at <https://www.i-jmr.org/2026/1/e96541/> with the visual abstract.

Could you please send me a copy of the final visual abstract for my records? The PDF plus a high-resolution image version would be ideal if both are available. I would like to have the final work on file.

One related question: Are there any terms and conditions I need to follow while using the visual abstract, for example in conference slides or on Yuimedi's website? I want to make sure I attribute and use it correctly.

Thank you again for putting this together. It came out beautifully.

Best,
Samuel

Hi Samuel,

Thank you so much for the kind words! I'm thrilled to hear that you are happy with how the final visual abstract turned out and that it complements your newly published paper.

I have attached both the PDF and a high-resolution PNG image file for your records.

Regarding usage: Because the paper is published Open Access under a Creative Commons Attribution License (CC-BY), you are completely free to share, present, and reuse the visual abstract—including on conference slides, personal/company websites, or social media.

We just ask that you retain the original branding/attribution on the graphic and include a link or reference back to the published article.

Congratulations again on the publication! Please feel free to reach out if you need anything else.
