Hi Laura,

Copyediting is complete. I approved the copyedited manuscript on 10 August, and the proof gives a publication date of 21 August 2026.

That creates a timing problem I would appreciate your help coordinating, since it spans production and the author experience team.

I submitted the visual abstract questionnaire on 6 August, the same day I received it. Natalia's note said the process typically takes three weeks from receipt of the completed questionnaire, which puts the visual abstract around 27 August, roughly six days after the article appears, and that is before the single round of author review.

The reason this matters beyond the ToC image: as I mentioned on 2 August, I purchased the in-house visual abstract service specifically so it could serve as both the ToC image and the graphic in the Sponsored Tweet Campaign. If the sponsored tweet goes out at publication on 21 August, it will carry the standard ToC image instead, which undercuts the purpose of both purchases.

Could you please help with either of the following:

1. Expedite the visual abstract so the draft reaches me by about 18 August. I will review and approve it the same day I receive it, including over a weekend, so that my side is never the constraint.
2. Failing that, schedule the Sponsored Tweet Campaign to run once the visual abstract is live, rather than at publication. I would much rather the paper be promoted once with the intended graphic than promoted on 21 August with a placeholder.

I am otherwise content to publish with the standard ToC image and have it swapped afterwards, as Natalia described. Two clarifications on that: does the swap update the article landing page, the journal table of contents, and the article PDF, or does the PDF retain the image published on 21 August?

On your earlier question about including the previously commissioned graphic as a Multimedia Appendix: I would prefer to leave it out. It carries the pre-copyediting title ("Healthcare … Three-Pillar") and does not name the HITL-KG framework, so it would be inconsistent with the published article. The in-house visual abstract will cover this need.

Thank you,
Samuel

> > > I am contacting you regarding manuscript **#96541**, which has recently been accepted for publication in **JMIR Interactive Journal of Medical Research**. Your article will now enter pre-production. For more

information on this process, please see our Knowledge Base article.

Once your paper has been ingested to the production platform, a copyeditor will be assigned to it for editing. You will receive an email from the copyeditor once the first stage of copyediting is complete. For more information on the copyediting process, please see here.

Please note that it is the responsibility of the **corresponding author** to collect responses from the author group and communicate them to the Production Editor of your paper. **This ensures that no responses or corrections from the authors are overlooked and that they are all consolidated in one place.**

Please respond to the following points:

1. While you have had a visual abstract created, we are unfortunately unable to use it as the TOC image for the paper, per our policy on visual abstracts: https://support.jmir.org/hc/en-us/articles/35112078050459-Can-I-Submit-My-Own-Visual-Abstract. I can include this as a Multimedia Appendix for the paper, but it won't be the TOC image for the paper. Additionally, if we publish this as a Multimedia Appendix, inclusion of the AJE branding is not encouraged. In order to include it as a multimedia appendix, we would have to request that the AJE branding be removed. Are you able to provide an alternative version without AJE branding to be uploaded as a Multimedia Appendix? If there are any design credit issues, please let us know and we can work to accommodate that.
    a. In regards to this, I have added an alternative TOC image for you, in line with our content guidelines.
2. I see that you have added the "Lifelong Author Ad" promotion. Please provide a URL to which you would want to point using the banner ad.
3. Please note that the attached manuscript will enter Production.

I look forward to working with you. Please don't hesitate to reach out as needed, I am happy to help with any questions or concerns.

Thank you,

Laura

Hello Samuel,

Thanks for reaching out to let me know about this timing issue. I will note that the August 21 date is an estimate, and this date can be easily updated in the paper endmatter as needed. However, I do agree that your paper is likely on track to be ready to publish roughly around this time, barring any unforeseen issues.

I have reached out to Natalia about the abstract, and unfortunately as the creation of VA's is outsourced we cannot expedite them much as we are required to provide our vendor with a certain amount of time to complete them. They will

do the best they can, but there is no guarantee the timeline can be improved, unfortunately.

My personal suggestion would be that we simply hold the paper once it gets to the final stage and publish once the VA is complete and then the tweet will be sure to contain the appropriate accompaniment. This I can manage directly, and mitigates potential issues with automated system actions.

If the time between the paper being ready and the VA being ready is really excessive, we could look at the option to delay the tweet, but I have to connect with marketing about that process to confirm it is possible. We definitely could do a secondary tweet and promote that one once the VA is complete, but there might be a default (not promoted) tweet that is automated upon publication if we publish first with a different TOC. I am not 100% certain on this yet but am looking in to it for you and will continue to update you.

Regarding your question though - if we did publish with a standard TOC, the HTML version of the article and any instances of the article on the JMIR pages would indeed update with the change. The PDF would not contain the TOC image at all, unless it was included as a Multimedia Appendix, so there would be no change there in normal process.

Thanks for your reply regarding the original commissioned graphic also - it is currently not included, so we will not add it given your response.

I hope to get back to you by Thursday with more information about the sponsored tweet process, but it is my strong recommendation that we simply hold the paper once it is ready until the VA is ready and then just publish the paper with the VA, if that would be acceptable to you. Please let me know your thoughts.

Thank you
Laura

Hi Laura,

Thank you, this is very helpful.

I would like to follow your recommendation: hold the paper at the final stage until the visual abstract is complete, then publish it with the visual abstract in place and send the sponsored tweet alongside it.

Thank you for coordinating across teams on this.

Best,
Samuel

Hi Laura,

I just submitted my approval of the typeset proof in Kriyadocs.

Looking forward to reviewing the visual abstract from Natalia's team so we can lift the hold on the publication.

Thank you again for managing this across teams.

Best,
Samuel

Hi Laura,

Thank you for seeing this through and for suggesting the hold in the first place. I'm pleased to see the article live at

https://www.i-jmr.org/2026/1/e96541/ with the visual abstract in place.

Now that it has published, could I ask about follow-up on a few of the items I purchased with the article? I checked the article page, so most of this is confirmation rather than a question:

1. PubMed record. I see the Ahead of Print deposit went through at https://pubmed.ncbi.nlm.nih.gov/42497119/ . Do you happen to know if the "Interact J Med Res
. 2026 Jul 13:15:e96541. doi: 10.2196/96541. Online ahead of print." citation will update to "Interact J Med Res. 2026 Aug 31;15:e96541. doi: 10.2196/96541" as on https://pmc.ncbi.nlm.nih.gov/articles/PMC13528883/ ?

2. Sponsored Tweet Campaign. Could you please let me know when this is scheduled? And is it from the https://x.com/jmirpub account? I would like to amplify it from my LinkedIn account when it goes out.

3. TrendMD. I can see the widget is live on the article page. I have not yet seen my article appear in TrendMD widgets elsewhere, including on closely related JMIR articles, though I appreciate it's only been a day since publication. Could you please tell me when the promotion campaign begins, how long it runs, and whether I can expect any reporting on it?

4. Lifelong Author Ad. Confirmed live and pointing to us.yuimedi.com, thank you. Since this is a lifelong ad, could you please let me know the process for updating the destination URL later if our site structure changes?

Thank you again for everything on this.

Best,
Samuel

Hi Samuel,

You're very welcome! Happy that you're able to see the article live with the Visual abstract as well.

Thank you for your follow up questions-

Regarding the PubMed record - this appears to be a cache or slight delay at Pubmed's end. Our team will monitor this and check in/reach out to PubMed if the record is not updated in the next couple of days.

Regarding the Sponsored Tweet and TrendMD promotions, I have forwarded your email to our marketing team and asked them to reach out to you about these two items.

Regarding the lifelong author ad - if you ever need to update the URL, please just email support@jmir.org with your request, and they will be able to help you with the update.

Thank you,
Laura

Hi Laura,

Just checking in on these 3 items. I'd appreciate your help nudging them along:

1. PubMed: The record at https://pubmed.ncbi.nlm.nih.gov/42497119/ appears to be out of sync and still shows the pre-copyediting title, the July 13 date, and "Online ahead of print." Would your team please be willing to follow up with PubMed?

2. Sponsored Tweet: I checked https://www.i-jmr.org/2026/1/e96541/tweetations , https://x.com/jmirpub , and https://bsky.app/profile/jmirpub.bsky.social , and the sponsored tweet doesn't appear to have been released yet.

3. TrendMD: I'm having trouble finding the article in TrendMD widgets on related pages. I checked the following JMIR articles, but none of them linked back:
https://www.jmir.org/2024/1/e56316/
https://www.jmir.org/2025/1/e57858/
https://www.jmir.org/2022/3/e32994/
Could marketing please confirm the campaign is running?

No urgency on any of this. Thank you again for offering to check in with the relevant teams.

Best,
Samuel

Hello Samuel,

So, we are still waiting to hear back from PubMed/production platform about the first item, but I have an update on the sponsored tweet. Here is a direct link to the tweet: https://x.com/jmirpub/status/2094846699487609125

The marketing team also shared the below item with metrics - according to them, there are 5 ads running now. total link clicks for the ad: 152. I'm not well versed on Twitter - let me know if this is helpful or if more information is needed.

Regarding TrendMD, marketing says they are asking the rep to send some data about what has already happened, but they confirm the campaign has started and is estimated to run until December 2.

Hope to follow up again tomorrow with a better update on the PubMed front too.

Thanks,
Laura

Hi Laura,

Thank you for tracking all 3 of these down so quickly, and please pass my thanks on to your manager and the marketing team. I've confirmed everything on my end: the PubMed record now shows the published version, and the tweet link and ad metrics were very helpful. It turns out promoted posts don't show up on the Tweetations tab or the @jmirpub timeline, which is why I couldn't find it.

Two small things, whenever convenient:

1. TrendMD: when the rep sends the campaign data, could you please forward it to me?

2. The article page (https://www.i-jmr.org/2026/1/e96541/) still lists "PMID: 42497119". The link works through the redirect, but could it be updated to 42684405?

Thanks again for all your help with this article.

Best,
Samuel

To: Samuel Harrold <samuel.harrold@yuimedi.com>
Cc: Samuel Harrold <samuel.harrold@gmail.com>

Hi Samuel,

Thanks! I am glad it was helpful.

For the TrendMD data, I got this from marketing on Sept 10:

The Continuity Trap in Data Science Health Research	Total		Sep 2026 MTD
Performance of your articles on external sites			
Inbound sponsored impressions	56,661		56,661
Inbound sponsored CTR	0.04%		0.04%
Inbound sponsored clicks	**25**		25
Credit balance reporting			
Cost per click (Campaigns)	$1.00		$1.00
Total dollars spent	$25.00		$25.00

Let me know if that is helpful - again, this part isn't really my wheelhouse, so it's hard for me to tell if this information is useful and accessible for you, or if you're looking for any other information, so feel free to let me know.

For the listed PMID number being incorrect - I put in a request and this should now be fixed! You can check at https://www.i-jmr.org/2026/1/e96541/

Thank you,
Laura

To: Laura McReynolds <laura.mcreynolds@jmir.org>
Cc: Samuel Harrold <samuel.harrold@gmail.com>

Hi Laura,

Thank you for fixing the PMID, the article page now shows 42684405.

On the TrendMD data, I think there is a mix-up worth passing to marketing. The table is labeled "The Continuity Trap in Data Science Health Research," which is a different JMIR article (Adebamowo et al., J Med Internet Res 2026;e98699).

I also found my article's TrendMD listing on another publisher's site, and it looks like the two campaigns have been crossed. The attached screenshots are from this BMJ Open article page, captured on Sep 24 at 03:10 UTC: https://bmjopen.bmj.com/content/11/3/e044289

In the same "Other content recommended for you" widget:
- My article is listed as "Healthcare Analytics Challenges: A Three-Pillar Framework..." with the author shown as "Clement Adebamowo" (TrendMD campaign ID 6nFy9EFs).
- "The Continuity Trap in Data Science Health Research" is listed with the author shown as "Samuel Harrold" (campaign ID MJ6iVWT7).

My listing also uses the pre-copyediting title rather than the published "Health Care Analytics Challenges: A 3-Pillar

Framework...", and neither listing shows a journal name.

Could marketing please:
- confirm that campaign 6nFy9EFs links to my article (https://www.i-jmr.org/2026/1/e96541/),
- correct the author names on both listings, my title, and the journal names, and
- send the performance data for 6nFy9EFs, since the Sep 10 numbers look like they are for the Continuity Trap campaign?

The other article's authors may want to know as well, since their listing carries my name.

Thank you again for your help with all of this.

Best,
Samuel

Samuel Harrold <samuel.harrold@yuimedi.com> Tue, Oct 6, 2026 at 6:38 AM
To: Jane Kelly <jane.kelly@jmir.org>
Cc: Laura McReynolds <laura.mcreynolds@jmir.org>, Samuel Harrold <samuel.harrold@gmail.com>

Hi Jane,

Thank you for passing this on to TrendMD. It looks like it has been fixed: my article now appears in TrendMD recommendations with the correct published title and my name (new campaign ID wLf4ILep), and the Continuity Trap article shows its own author again. The attached screenshot is from the same BMJ Open page as before, captured on Oct 6 at 01:51 UTC: https://bmjopen.bmj.com/content/11/3/e044289

Three small follow-ups, whenever convenient:

1. Could TrendMD confirm that clicking the new listing opens my article (https://www.i-jmr.org/2026/1/e96541/)? I can see the title and name are right, but not where the link goes, and given the earlier mix-up I want to be sure readers land on the

right paper.

2. The listing shows my name but no journal name or year, unlike the other sponsored listings (for example "Author, Journal, 2024"). Could TrendMD add "Interactive Journal of Medical Research, 2026"?

3. Could you send the performance data (impressions, clicks, and spend) for my campaign, including the earlier campaign ID 6nFy9EFs as well as wLf4ILep? The Sep 10 report Laura forwarded was for the Continuity Trap article.

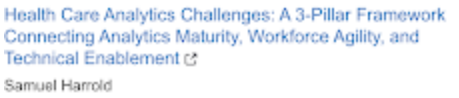

Thank you again, and thanks to Laura for connecting us.

Best,
Samuel

Hi Jane,

I'd like to follow up on my Oct 6 message. My listing still looks correct, so the only outstanding item is the performance data (impressions, clicks, and spend) for my campaign. Could TrendMD please send it for both campaign IDs, 6nFy9EFs (the original) and wLf4ILep (the replacement)?

You can disregard my other two questions. Regarding the journal name, the attached screenshot shows that other JMIR listings in the same widget also display only the author's name. This suggests it's a JMIR-wide setting rather than something specific to my listing.

Thank you,
Samuel

Hi Samuel,

I am sorry this has been ongoing for so long, I didn't realize you hadn't gotten any response to your query. I have followed up with Jane separately as well to confirm if she can get back to you regarding your request.

Thank you for your follow ups and I hope we have an answer for you soon.

Laura

Hi Samuel!!

Just an update, I just realized Jane is on vacation at the moment. I have forwarded your request to another marketing representative to see if they can help, but wanted to keep you in the loop given that may be why we haven't heard back from Jane yet.

Thanks again for your patience and once again hope we can have this resolved soon for you

No problem - thank you Laura so much for seeing this through.

Best,
Samuel

Hi again Samuel,

I received this from another representative from the marketing team:

Attached is the performance report covering both the original and replacement campaigns for the paper.

The TrendMD rep noted that the 86 clicks from the original campaign (ID: 6nFy9EFs) will be redirected to the replacement campaign (ID: wLf4ILep).

I hope this is helpful and resolves! As always, thanks for your patience.

Laura
