Upload Revised Manuscript, Appendices, Figures

1. UPLOAD FIGURES (SEPARATELY, JPG, PNG OR GIF)

Upload high-quality figures as image (PNG/JPG) files. For manuscripts discussing electronic systems or interventions we usually require 1-2 screenshots of the game/system as figure. Also, upload an "illustrative" figure or photo to be used for our homepage and the table-of-contents (we call this a "TOC image").

[Figure 1. Human-in-the-Loop Knowledge Governance \(HITL-KG\) architecture. A clinical user's natural language query \(step 1\) is translated to SQL and run against the data warehouse \(steps 2-3\); an expert validation gate \(step 4\) either returns confirmed insights \(steps 5-6\) or loops back for correction. Confirmed query triples enter organizational memory \(step 7, dashed line\), which informs future queries and curates the knowledge base \(step 8\), closing a](#)

[main remain static.](#)
[architecture.figure.png](#)

2.

Figure 2. [The six-step Validated Query Cycle and its mapping to the three pillars. A natural language question \(step 1\) yields candidate SQL \(step 2\) that the analyst validates against the system's explained logic \(step 3\), looping back if incorrect. Validated triples are stored in organizational memory \(step 4\), matched by future queries \(step 5\), and persist across staff turnover \(step 6\). Dashed arrows mark the pillar outcomes: storage advances analytics maturity, persistence stabilizes workforce agility, and retrieval increases technical enablement. knowledge-cycle.figure.png](#)

NEW FIGURE

- allowed file extension(s): .png
- max file size for .png is 5MB
- max dimensions (width x height) for .png is 1200 x 1200 pixels

[Choose File](#) No file chosen

Note: File will upload automatically after you chose one from your hard drive

Multimedia Appendices can be questionnaires, datasets, videos/screencasts, Powerpoint or PDF files showing multiple screenshots (please also use 1-2 screenshots as figures in the paper), files containing the source code of a computer program, informed consent documents. For protocols/proposals intended for JMIR Res Protoc also upload review reports from the funding agencies if available.

NEW APPENDIX

- max file size for .mov, .mp4, .avi is 200MB
- max file size for .txt, .doc, .docx, .xls, .xlsx, .ppt, .pptx, .zip, .rar, .7z, .pdf is 255MB

[Choose File](#) No file chosen

Note: File will upload automatically after you chose one from your hard drive

Please choose file with .png, .mov, .mp4, .avi, .txt, .doc, .docx, .xls, .xlsx, .ppt, .pptx, .zip, .rar, .7z, .pdf format only

3. UPLOAD ADDITIONAL MATERIAL (FOR EDITORS/REVIEWERS' EYES ONLY)

We recommend to upload a tracked-changes version, and also the responses to the reviewers, as additional file. Also, upload potentially overlapping material submitted or published in other journals (make sure to outline in your notification to the editor how this paper is different, and why "salami-slicing" into multiple publications is justifiable). CONSORT (for RCTs only), PRISMA (systematic reviews) and other reporting checklists should also be supplied, if available.
